38443-14 Screening Level Tables 061913.xlsx

Hello Brett

Please find attached a revised file of screening level tables. The tabs have been reordered to match the DQO tables, and titled with the applicable media. Screening Level Table 4.1 'Soil' applies to two of the DQO tables: Table 3.1 – Southern Parcels Fill Investigation, and Table 3.6 – Floodplain soil Investigation.

In accordance with the May 23<sup>rd</sup> conference call, the screening level tables were prepared to include all screening values for all media. Human Health and Ecological screening level criteria were included in these tables. These screening level criteria may not necessarily be included in the 38443-Report 19 OU2 RI Scoping Document DQO tables.

The revised CSM will be submitted next week.

Thank you,

Valerie

Thank you, Valerie. Could you please provide direction as to which table applies to which media or pathway? There are currently 6 DQO tables being reviewed and there are 5 tables in your attachment, and without titles we cannot tell what each table refers to.

Thank you.

Hello Brett,

Please find attached the draft Screening Level Tables.

I'll have a better idea tomorrow when the CSM will be available.

Thank you,

Valerie

**Subject:** South Dayton Dump - OU2 CSM and table of screening levels

Hello Valerie –

We were informed by EPA that CRA would attempt to provide an updated conceptual site model (CSM) and table of screening levels for the OU2 scoping review. The indication was that the CSM would be submitted last week and the table of screening levels this week. We are just asking for a status on that material, so we can in turn schedule our reviews of the OU2 DQO's.

Please let us know when you believe this material can be sent out for review.

Thank you.
